RECEIVED  
NOV 16 2015  
DIV. OF OIL, GAS & MINING

Included you will find another W9, as per request from Mr. Baker. This year has been a long hot summer, but satisfactory in the amount of reclamation progress. The two areas as outlined in the previously sent maps, (encompassing areas 1 and 2 of the original mine permit of the freedom from war mine) are virtually done. The winter fat and grass has grown to more than 70% of the original landscape. Although It has been a tough year for any progress in the growth of grasses. (less than 50% normal precipitation), a year of hundred percent of precipitation, the grass will just explode. I would welcome a visit from Mr. Britton or Mr. Baker, so that we can proceed with a release of payment, of the funds that are presently held in escrow.

The out of bounds areas as noted on maps: These areas are 95% done, bearing in mind this is probably a life time of adjustments and the return of productive acres. I own the acres and will not just up and leave. DOGM vision of completion are different than mine and would welcome any insight to your review.

I trust this will meet your satisfaction, if not you will be able to contact me at the following: [brothers@cut.net](mailto:brothers@cut.net), cell phone 435-469-0890, office 435-462-3258, home phone 435-462-3116. I will be leaving for a short vacation on or around 1/17/2016, at which time I will be available on my cell only, you may leave a message with the Asst managers Adam Brothersen/Sammi Brothersen, at the office phone.

Boyd A. Brothersen
